"Enhancing our youths’ competitive edge through merit badges"
Soil and Water Conservation

1. Do the following:
   (a) Tell what soil is. Tell how it is formed.
   (b) Describe three kinds of soil. Tell how they are different.
   (c) Name the three main plant nutrients in fertile soil. Tell how they can be put back when used up.

2. Do the following:
   (a) Define soil erosion.
   (b) Tell why it is important. Tell how it affects you.
   (c) Name three kinds of soil erosion. Describe each.
   (d) Take pictures or draw two kinds of soil erosion.

3. Do the following:
   (a) Tell what is meant by conservation practices.
   (b) Describe the effect of three kinds of erosion-control practices.
   (c) Take pictures or draw three kinds of erosion-control practices.

4. Do the following:
   (a) Explain what a watershed is.
   (b) Outline the smallest watershed that you can find on a contour map.
   (c) Then outline on your map, as far as possible, the next larger watershed which also has the smallest in it.
   (d) Explain what a river basin is. Tell why all people living in a river basin should be concerned about land and water use in it.
   (e) Explain what an aquifer is and why it can be important to communities.
5. Do the following:
   (a) Make a drawing to show the hydrologic cycle.
   (b) Show by demonstration at least two of the following actions of water in relation to soil: percolation, capillary action, precipitation, evaporation, transpiration.
   (c) Explain how removal of vegetation will affect the way water runs off a watershed.
   (d) Tell how uses of forest, range, and farm land affect usable water supply.
   (e) Explain how industrial use affects water supply.

6. Do the following:
   (a) Tell what is meant by “water pollution.”
   (b) Describe common sources of water pollution and explain the effects of each.
   (c) Tell what is meant by “primary water treatment,” “secondary waste treatment,” and “biochemical oxygen demand.”
   (d) Make a drawing showing the principles of complete waste treatment.

7. Do TWO of the following:
   (a) Make a trip to TWO of the following places. Write a report of more than 500 words about the soil and water and energy conservation practices you saw.
      (1) An agricultural experiment
      (2) A managed forest or woodlot, range, or pasture
      (3) A wildlife refuge or a fish or game management area
      (4) A conservation-managed farm or ranch
      (5) A managed watershed
      (6) A waste-treatment plant
      (7) A public drinking water treatment plant
      (8) An industry water use installation
      (9) A desalinization plant
   (b) Plant 100 trees, bushes, and/or vines for a good purpose.
   (c) Seed an area of at least ½ acre for some worthwhile conservation purpose, using suitable grasses or legumes alone or in a mixture.
   (d) Study a soil survey report. Describe the things in it. On tracing paper over any of the soil maps, outline an area with three or more different kinds of soil. List each kind of soil by full name and map symbol.
   (e) Make a list of places in your neighborhood, camps, school ground, or park that have erosion, sedimentation, or pollution problems. Describe how these could be corrected through individual or group action.
   (f) Carry out any other soil and water conservation project approved by your merit badge counselor.
Resources

Scouting Literature

Visit the Boy Scouts of America’s official retail website at http://www.scoutstuff.org for a complete listing of all merit badge pamphlets and other helpful Scouting materials and supplies.

Acknowledgments

The Boy Scouts of America thanks Gary M. Stolz, Ph.D., U.S. Fish and Wildlife Service, and the USDA Natural Resources Conservation Service for their technical expertise and guidance during the revision of this merit badge pamphlet.

The Boy Scouts of America is grateful to the men and women serving on the Merit Badge Maintenance Task Force for the improvements made in updating this pamphlet.

The Boy Scouts of America thanks the following for their help with previous editions of this pamphlet, upon which this edition is based: Jerry Bernard, Ken Carter, Bruce Dubee, Doug Holy, Tarleton A. Jenkins, Walter E. Jeske, Ted Kupelian, Katherine N. Mergen, Paul Reich, and Robert F. Tegner of the Natural Resources Conservation Service, U.S. Department of Agriculture, with the counsel and technical assistance of other personnel of the Natural Resources Conservation Service. We also appreciate Ed Partington, Environmental Protection Agency, for his assistance.
