- 9.2 Release from Restriction
 - 9.2.1 Release of Contributions from Restriction
 - 9.2.2 Release of Net Assets from Restriction
- 9.3 Restricted Funds Report
- 9.4 Decision Tree: Restricted Revenues
- 9.5 Table: Contribution Accounts
- 9.6 Decision Tree: Restriction Release
- 9.7 Table: Release of Temporary Restrictions
- 9.8 Table: Release of Permanent Restrictions

9.1 Classification of Original Gifts

Contributions are classified as to the types of restrictions placed upon the contribution by the donor.

Rule: Only a donor can place a restriction upon a gift. Neither the executive board nor the Scout Executive of the council can initiate, change or release a restriction.

The three types of classifications are:

9.1.1 Unrestricted

There are no donor restrictions placed upon the gift.

9.1.2 Temporarily Restricted

These are donor imposed restrictions that can be satisfied by the passage of time (for example, a pledge made this year for next year's council operations) and/or by a council's action (for example, the money was donated for a specific project such as building a dining hall at camp).

9.1.3 Permanently Restricted

These are donor imposed restrictions that cannot be removed by the council (for example, a donation to the Endowment fund).

9.1.4 Recording the Original Gift

The contribution is credited to the appropriate contribution account number based on the type of gift and is tagged with the class code based on the type of restriction. Careful documentation should be maintained on all restricted gifts, particularly where the restriction can be lifted at some future date.

Examples: A contribution from legacies or bequests would be recorded in one of the following accounts:

- 4301-90 for unrestricted
- 4301-91 for temporarily restricted
- 4301-92 for permanently restricted

A direct endowment gift could be 3-4501-XXX-92

An FOS pledge can be made for the current year, or for a future year and would be recorded as:

- 4001-90 for an unrestricted gift for the current year
- 4001-91 for a temporarily restricted gift for a future year

See item 9.5 below for a table that lists all the possible restricted accounts.

9.2 Release from Restriction

Once the council accepts a gift that is restricted, it incurs the obligation of tracking and documenting council actions to meet the donor's intent. Once the council performs the required action the restriction may be removed and record a decrease in Temporarily Restricted Net Assets and a corresponding increase in the Unrestricted Net Assets of the council. This release may be a release of contributions or a release of net assets, depending on the timing of the release

9.2.1 Release of Contributions from Restriction

If the release is to occur within the same fiscal year as the original contribution, create a transaction that debits the temporarily restricted contributions account and credits the unrestricted contributions account.

Example:

A donor contributed \$1,000 for camperships. The contribution was placed in account 4501-91, Contributions—Other Direct with a Temporarily Restricted class code of 91. In that same year, camperships in the amount of \$500 were used by Scouts. To reclassify the contribution and release from the restriction:

4501-XXX-91 Contributions—Other Direct—Temporarily Restricted	500.00
4501-XXX-90 Contributions – Other Direct – Unrestricted	500.00

9.2.2 Release of Net Assets from Restriction

At year-end, all temporarily restricted contributions are written to temporarily restricted net asset accounts in the range 3005 to 3065 (**see section 9.7**) range of accounts. Those balances remain there until the council has fulfilled the requirements of the gift. At that point those net assets may be released from restriction:

3605-XXX-01 Reclass Other Direct - Temporarily Restricted	500.00
3605-XXX-00 Reclass Other Direct - Unrestricted	500.00

(see the table below to define other types of release entries)

The reclassified net assets accounts (3600 series) are reported on the Statement of Operations as Net Assets Released from Restriction within each contribution type. Budgets may be assigned to the unrestricted, reclassification accounts. Example: Account 3630-00, Budget \$500.

9.3 Restricted Fund Report

This report is designed to show temporarily restricted balances by cost center, along with additions, reclassified amounts, and unrestricted income and expenses. Temporarily restricted and unrestricted reclassification of net assets should always equal each other.

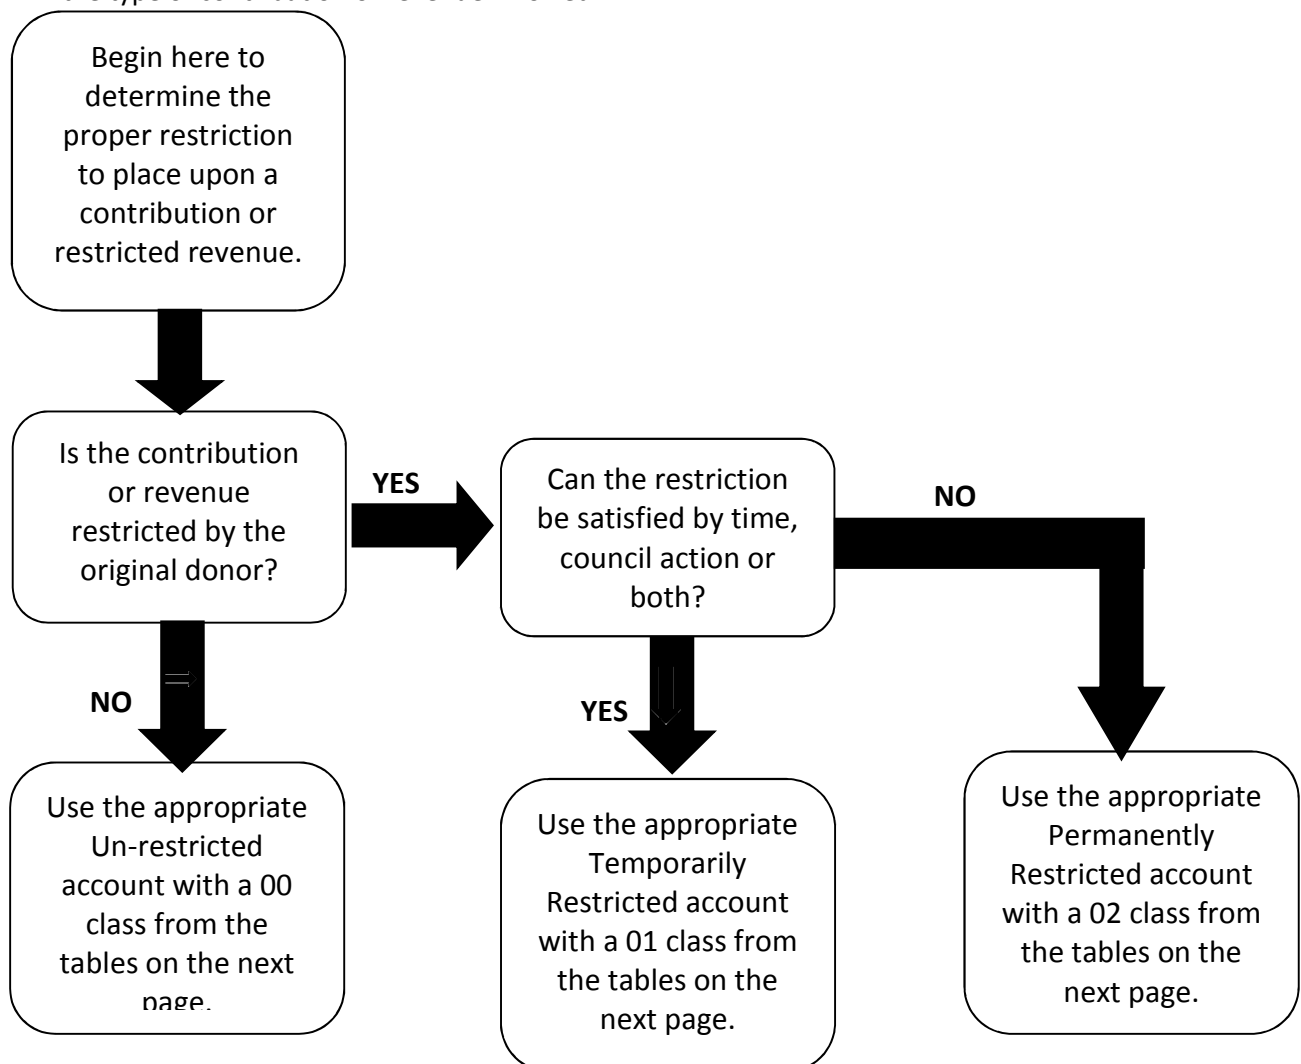

Tip: Contributions received in a prior year for the current year will always be expressed as a part of the Reclassified Net Assets line on the Statement of Operations—Unrestricted.

In order for the budgets to reflect the appropriate amounts on the Statement of Operations—Unrestricted, always begin by budgeting the contribution accounts for the full amount of the anticipated budget. At the end of the current year, you will know the amount of money that has been received for the next year. At current year-end, all of this money will be closed to temporarily restricted net assets accounts. As you open the new year, decrease the budgets on the contributions accounts and add the budgets to the reclassified net assets accounts by the amount reflected in the temporarily restricted net asset account. This will cause early gifts to be reflected properly in the budget columns on the Reclassified Net Assets line of the Statement of Operations—Unrestricted.

9.4 Decision Tree: Restricted Revenues

It is very important that restricted contributions and restricted revenues be recorded correctly when they first enter the local council accounting system. Many of these entries will originate in the fund-raising software but regardless of the source, please be certain that the proper account is used initially.

The guide below and the table on the next page will help you determine the correct account based on the type of contribution or revenue involved.

9.6 Decision Tree: Restriction Release

When a donor's **temporary restriction** has been satisfied by time or by action of the council, the funds can be released from restriction and allow them to flow into the unrestricted funds area. The GL system has specific accounts to release depending on the type of original gift and whether the contribution was received in the current year or in some prior period. If the release comes in the same year as the original gift the move is to release **contributions** or **revenue**. If the release happens in a subsequent fiscal year then the release involves net assets.
