Youth LABOR FORCE Trends

**Percent of the Population of Youth 16 to 24 Years Old in the Labor Force in July
by Race and Hispanic/Latino Ethnicity**

Source: News release August 20, 2013, Employment and Unemployment Among Youth—Summer 2013, Bureau of Labor Statistics, U.S. Department of Labor

- The month of July is typically the summertime peak in youth employment because large numbers of high school and college students take summer jobs, and many graduates enter the labor market for permanent employment. The labor force includes all young people working or looking for work.
- In July 2013, 23.5 million young people ages 16 to 24 were in the labor force, representing a participation rate of 60.5 percent of that total population. About 15.4 million people in this age group (39.5%) were not seeking employment.
- In July 2013, 19.7 million 16- to 24-year-olds were employed (50.7% of that total population). Nearly 10 percent (9.8%) of 16- to 24-year-olds were not employed, but seeking employment.
