

Cradle of Liberty Council Safety Tips for Parades

Apply the “Sweet Sixteen of BSA Safety”

1. *Qualified Supervision:* Do you have enough adults to supervise scouts and monitor for hazards?
2. *Physical Fitness:* Both adults and youth need to be fit for the length and conditions of the route.
3. *Buddy System:* Always essential -- especially in crowded environments!
4. *Safe Area or Course:* Parades can bring risks that might not ordinarily be present:
 - Moving vehicles and machinery
 - Animals
 - Firearms or fireworks
 - Hazardous weather
 - Large or unruly crowds
 - Potential for thrown objects
5. *Equipment Selection and Maintenance:* Any vehicle used for transporting passengers should be equipped with a secure passenger compartment and approved safety belts.
6. *Personal Safety Equipment:* Dress for the weather. Be sure to bring:
 - First aid kit
 - Rain gear
 - Good walking shoes
 - Water bottle
 - Sunblock
 - Insect repellent
7. *Safety Procedures and Policies:*
 - Allow adequate space between marchers and any vehicles
 - No walking next to or near floats or vehicles
 - No riding on floats, truck beds, or trailers
 - Designate a lookout to watch out for vehicles and other hazards
 - Take head counts before, during, and after parade
8. *Skill Level Limits.* Walking on asphalt can be very hot on a sunny day. Is marching in the parade too much for young Cub Scouts or older adults who are not accustomed to much walking?
9. *Weather Check:* If you hear thunder, seek safe shelter immediately.
10. *Planning:* Permission slips. Meeting spots for before and after the parade. Distribute maps and emergency cell phone numbers. Hold a pre-parade meeting with adult leaders. Consider shelter options in case of severe weather. Consider having a chase vehicle nearby or an ability to call for support.
11. *Communications.* Have radios or cell phones, and phone number lists.
12. *Permits and Notices.* File your application for a BSA tour permit and any other required permits
13. *First Aid Resources.* Have first aid supplies handy. Have trained adults. Find out what resources will be available at the parade, where they will be located, and how to contact them.
14. *Applicable laws.* Follow all parade rules and regulations.
15. *CPR Resource.* A CPR-trained adult is strongly recommended.
16. *Discipline.* Essential for safety.

For additional health and safety information, consult the Guide to Safe Scouting and the other resources available at the Scouting Safety webpage at www.scouting.org/HealthandSafety.aspx.
